---

## A) Installation - [top](#)

### Step 1) Upload the theme

Upon downloading the .zip file from theme forest you'll have all files inside the theme package. Do not upload the entire file you get from ThemeForest, upload only the **theme** folder.

There are two ways to upload a theme;

1) **Upload By FTP:** Login your hosting space via an FTP software and upload the theme folder into **wp-content/themes/** under your wordpress installation. Once you've uploaded the theme you can open Open WordPress Admin → Appearance→ Themes page and activate the theme from list.

2) **Upload By Wordpress Admin:**

- Zip the theme folder
- Open WordPress Admin → Appearance→ Themes
- Click *Install Themes* tab and hit *upload link*
- Find the the file you've zipped before and hit *install now* button

### Important Notice!

Theme is using `timthumb.php` auto resize image script and it needs to have the `/cache/` folder is writable. If your images are not displaying on your site please make sure it's writable.

### File permissions for thumbnail script

Please change the `/cache/` folder permissions to `777` .

for detailed instructions <http://www.darrenhoyt.com/2008/04/02/timthumb-php-script-released/>

Installing WordPress [http://codex.wordpress.org/Installing\\_WordPress](http://codex.wordpress.org/Installing_WordPress)

## Step 2) Activate the theme

Once you have uploaded the theme, open *WordPress Admin* → *Appearance* → *Themes* and activate your theme.

Using Themes: [http://codex.wordpress.org/Using\\_Themes](http://codex.wordpress.org/Using_Themes)

## USEFUL INFORMATIONS

### Finding page ID

To find the Page ID, go to *Pages* → *Edit* and hover over the title of the page. The status bar of your browser will display a URL with a numeric ID at the end. This is the page ID.

Pages Widget <http://support.wordpress.com/widgets/pages-widget/>

Finding the WordPress Page ID <http://www.techtr0t.com/wordpress-page-id/>

### URLs of Media Files

When you've added new media file, the url appears on the bottom of the page.

How to Find the URL for an Image <http://www.bestwpthemez.com/wordpress/how-to-find-the-url-for-an-image-937/>

*Screenshot of uploading new media*

## B) Home Page And Portfolio Sliders - [top](#)

You can add your posts, pages or free content into home page slider as slide. Before start to create your slides please be sure you've made your changes on [RT-Theme Settings -> Slider Options](#)

 <p>a screenshot of sample usage. click image to enlarge!</p>	<p>You must use the <a href="#">RT-Theme Slider Widget</a> to add new slide.</p> <ul style="list-style-type: none"><li>• Go to Appearance -&gt; Widgets</li><li>• Drag &amp; Drop one of RT-THEME SLIDER WIDGET into the <b>"Slider Widget" or "Portfolio Slider Widget"</b> area.</li><li>• You can choose a page and post to link your slide or give manually Title and Url.</li><li>• You can use <b>single image</b> on the home page slider and give it a link to part of your web site as you wish. For this you can use all options (page, post, manual). Just put your image's url into the <b>"Image For Slider"</b> field. If you've selected manual you may want to give a link to image using with <b>Link (URL)</b> field.</li></ul>
--	---

## C) General Options - [top](#)

<p>Screenshot</p>  <p>click image to enlarge</p>	<p>Stlye and color options :</p> <p>You can select a style for your website.</p> <p>Logo Options:</p> <p>Upload your logo using media tools of wordpress and write URL of your logo life. (<a href="#">how i can upload</a>)</p> <p>Include Page navigation:</p> <p>Select your pages and click save.</p> <p>Show drop down menu?:</p> <p>You can disable/enable the dropdown menu by using this option.</p> <p>Include pages for footer:</p> <p>Select pages you want display on footer.</p> <p><i>There are too many options for details please see the image on the right.</i></p>
---	---

## D) Slider Options - [top](#)

Q. HOW CAN I ADD NEW SLIDES TO HOME PAGE AND PORTFOLIO SLIDERS?

[A. PLEASE READ "HOME PAGE AND PORTFOLIO SLIDER" SECTION.](#)

---

## E) Portfolio Options - [top](#)

**Select portfolio categories :**

Select categories which you want to use for portfolio. The categories that you've been selected will use in portfolio listing layout.

**Select your portfolio page:**

"Our Portfolio" link on the menu bar. Chose a page even if you don't want to use on menu bar, this page is the start page of your portfolio.

**Select Portfolio Start Category:**

As default, RT-Theme 9 shows all portfolio items on the portfolio home page. You may want to show your selected works like "latest works" In case you must select a start category.

**Show Portfolio Categories As Drop Down Menu**

If you want to show the selected portfolio categories under the PORTFOLIO page on navigation, you must check the box.

**Hide Portfolio Slider**

Check this box if you don't need a slider on your portfolio

**Hide Portfolio Categories Bar**

Check this box if you don't need the bar which shows portfolio categories.

## E1) Adding New Portfolio Item - [top](#)

To add new portfolio item add new post and use the RT-Theme Custom Fields for setting up your portfolio item.  
There are several things you must know;

- If you set a thumbnail image the auto thumbnail function automatically disable for the item.
- If you don't put a link for "Media for blog posts" area the lightbox disable automatically.
- When adding videos or swf files please use your own thumbnail image.
- Example media url for IMAGE portfolio items

### Select product showcase categories :

Select categories which you want to use for product listing. The categories that you've been selected will use in product listing layout.

### Select your product list page:

" Our products" link on the menu bar. Chose a product list page even if you don't want to use on menu bar, this page is the start page of your product showcase.

### Select Product Page Start Category:

As default, RT-Theme 9 shows all products on start page. You may want to show your selected products like "featured products" In case you may select a start category.

### Don't Show Products On Start Page:

If you want to remove products from the start page of product catalogue check this option. You can put your content in the "product list page" by using Pages -> Edit

### Show Product Categories As Drop Down Menu

If you want to show the selected product categories under the product list page on navigation, you must check the box.

### Select Pages For Product Detail Side Navigation:

You may want to put shortcuts of your special pages like "contact with us" or "product inquiry form" etc. you can select them by using this select box.

## F1) Adding New Product - [top](#)

To add new product use the "RT-Theme Product Custom Fields" . There are several things you must know;

Screenshot	
 <p>click image to enlarge</p>	<ul style="list-style-type: none"><li>• <b>Product Image Url</b> The main product image url. This image will use on listing page and right side of product detail page as thumbnail. When clicked it on detail page, original version will be opened by the lightbox. You can use a logical size image for this field. Thumbnails will be generated by the system automatically. It must be local link because of the thumbnail image resizer script can't generate thumbnail images from a remote url. This means that you must use the media upload tool (upload button) of Wordpress.</li><li>• <b>Other images for this product</b> You can put unlimited image for this product. Please put all the image links line by line. All these images will be resized to 90*90 automatically. Leave blank if you don't need product photos tab.</li><li>• <b>Short Description</b> Short description for product listing pages.</li><li>• <b>Long description</b> Long description for product detail page.</li><li>• <b>Technical Details</b> You can put everything you want as content for technical details tab. Leave blank if you don't need.</li></ul>

	<p>don't need to this tab.</p> <ul style="list-style-type: none"> <li>• <b>Related products with this product</b></li> </ul> <p>You can add unlimited product for this field. Please put all the product ID's line by line.</p> <p>Leave blank if you don't need to this tab.</p>
--	---

## G) Blog Options - [top](#)

Select categories and a page for blog.

I.E

When clicking the "Blog" page, wordpress will list only posts of the "Company Blog" category. So, you need to create the categories and page first.

If you want to add a post image for your posts, don't forget to enter an image url to **Image for blog posts** option under Portfolio & Blog Fields.

## H) Contact Page Options - [top](#)

General Options	Slider Options	Portfolio Options	Photo Gallery Options	Blog Options	Contact Page Options
<b>Select Your Contact Page:</b>		Contact Us			
<b>Contact Form Mail:</b> Please write an email to deliver the contact form submissions.		ftolgacan@gmail.com			
Save changes					

Select your contact page and don't forget to put your contact email.

## I) Dynamic Sidebars Options - [top](#)

There are six default widget areas that you can use for the Slider, Home Page, Page Sidebar, Blog Sidebar, Contact Us Sidebar and All Theme's sidebars. But If you want to use the widgets just for a page or pages or categories or posts you can use the new Dynamic Sidebars Tool. For example, if you want to add latest blog posts or a banner image to you about us page, you can create a new widget area for about us page and use it as you wish.

## J) Main, Top and Footer menus - [top](#)

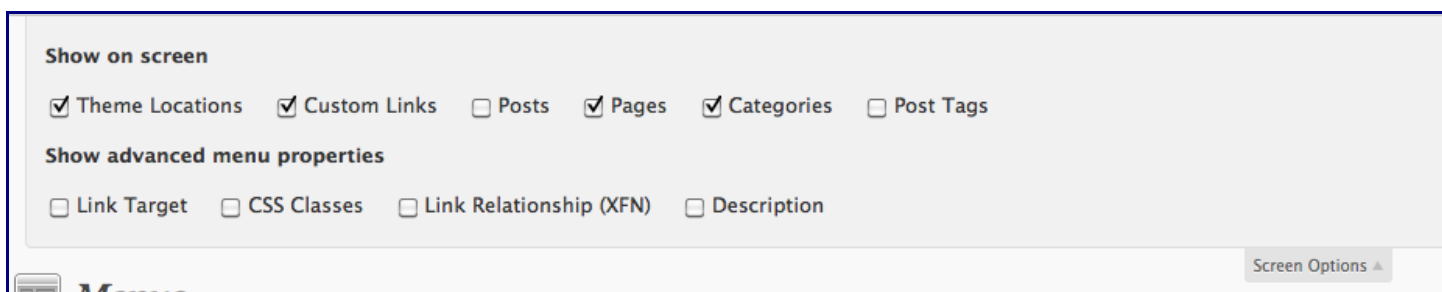

There are two embedded menu of the theme; ***RT Theme Main Navigation*** and ***RT Theme Footer Navigation***

1. Go, Wordpress **Appearance** → **Menu**
2. Choose the menu you want to edit from the tabs
3. Add your items, organize them and click **Save Menu** button.

The **Appearance Menus SubPanel** is available beginning with Wordpress 3.0. If you're new on this new menu feature of wordpress please read this article carefully ;  
[http://codex.wordpress.org/Appearance\\_Menus\\_SubPanel](http://codex.wordpress.org/Appearance_Menus_SubPanel)

To use all items like posts, tags etc. check the **Screen Options** to insure those modules are set to display.

## IMPORTANT NOTICE!

If you're already use RT-Theme 9 and upgraded 1.0.5 version you may want to keep using your old menu. In this case open RT-Theme General Options and check the box for **Enable RT-Theme default menu tools** option. When you save the options page the old menu system will be back.

## Navigation Bar Settings

Enable RT-Theme default menu tools? (since Wordpress 3.0):

If don't want to use new WP 3.0 menu tools, you can use RT-Theme menu tools.

Choose navigation bar pages :

Please select pages which you want display on navigation bar.

Please Select 

About Us	<a href="#">remove</a>
Portfolio	<a href="#">remove</a>
Our Products	<a href="#">remove</a>
Company Blog	<a href="#">remove</a>
Contact Us	<a href="#">remove</a>

---

## K) Content Boxes - [top](#)

To create a new content box you must use RT-Theme Box widgets which are written for the RT-Theme. For detailed information please read section [K\) RT-Theme Box Widgets below.](#)

### K1) Adding Contact Details to sidebars like demo page

Drag&Drop an RT-Theme Box widget into a widget area, choose manual option and put your html list codes like;

```
<ul>
<li><b>Adres: </b> Lorem Ipsum Dolor Sit </li>
<li><b>Phone: </b> +1 123 123 1233<br /></li>
<li><b>Fax: </b> +1 123 123 1233<br /></li>
<li><b>E-Mail: </b> info@companyname.com</li>
</ul>
```

### K2) Adding Google Maps to sidebars like demo page

Drag&Drop an RT-Theme Box widget into a widget area, choose manual option and put your embed codes like;

```
<iframe width="286" height="250" frameborder="0" scrolling="no" marginheight="2" marginwidth="2"
src="http://maps.google.com/maps?f=q&source=s_q&hl=en&geocode=&q=new+york&sll=52.908902,-
58.491211&sspn=13.219771,39.506836&ie=UTF8&hq=&hnear=New+York&ll=40.714216,-
74.005966&spn=0.065057,0.089264&z=12&iwloc=A&output=embed"></iframe>
```

### **K3) Adding Brand Logos to sidebars like demo page**

Drag&Drop a **TEXT** widget into a widget area, choose manual option and put your html list codes like;

```
<ul class="brands">
<li><a href="#" title=""></a></li>
<li><a href="#" title=""></a></li>
<li><a href="#" title=""></a></li>
<li><a href="#" title=""></a></li>
</ul>
<div class="clear_space"></div>
```

---

## **L) RT-Theme Slider Widget - [top](#)**

### **What is the RT-Theme Box Widget**

I've created three custom widget plugins for the theme. One of them is "RT-Theme Slider Widget". This plugin lets you add a slide to the home page slider. You can add the content manually or link with a page and post. Just drag and drop the widget "Slider Widget" area and fill options.

- Go to Appearance -> Widgets
- Drag & Drop the RT-THEME SLIDER WIDGET into the widget areas on the right.

Sample Usage

RT-THEME SLIDER WIDGET

Select an option to link your slide:

## O) JavaScript - [top](#)

This theme imports these Javascript files.

```
<script type="text/javascript" src="js/jquery-1.3.2.min.js"></script>
<script type="text/javascript" src="js/jquery-ui-1.5.2.packed.js"></script>
<script type="text/javascript" src="js/jquery.easing.1.1.1.js"></script>
<script type="text/javascript" src="js/jquery.cycle.all.min.js"></script>
<script type="text/javascript" src="js/jquery.validate.js"></script>
<script type="text/javascript" src="js/jquery.prettyPhoto.js"></script>
<script type="text/javascript" src="js/cufon.js"></script>
<script type="text/javascript" src="js/anivers_400.font.js"></script>
<script type="text/javascript" src="js/script.js"></script>
```

1) jQuery <http://jquery.com>

jQuery is a Javascript library that greatly reduces the amount of code that you must write.

2) jQuery Cycle - jQuery plugin <http://malsup.com/jquery/cycle/>

Cycle script on sliding gallery

3) DD\_belatedPNG png fix script for ie6 - <http://jquery.andreaseberhard.de/pngFix/>

This is a Javascript library that sandwiches PNG image support into IE6 without much fuss.

jquery.pngFix.pack.js

4) script.js - Coded by Tolga Can

Includes several functions

5) jQuery Easing - jQuery plugin <http://gsgd.co.uk/sandbox/jquery.easing.php>

Offers multiple easing options

6) jQuery PrettyPhoto jQuery plugin <http://www.no-margin-for-errors.com/projects/prettyPhoto-jquery-lightbox-clone/>

Lightbox plugin

7) jQuery UI <http://jqueryui.com>

jQuery UI JavaScript Library

8) Cufon <http://wiki.github.com/sorccu/cufon/about>

jQuery UI JavaScript Library

---

## P) PSD Files - [top](#)

There are 3 PSD files for each color option;

- *Background (background.psd)*

Use this files for main header background of your style. It has two slice one for center one for repeating background image.

- *Footer background (footer.psd)*

Same as main background use this file for footer of your design.

- *All Elements (all\_elements.psd)*

All the other graphics like shadows, lines, buttons etc.

### Using Slices PSD files

If you'd like to change the the main design elements (shadows, lines buttons etc.) open "all\_elements.psd", make your adjustments, then save the by choosing "save for web" to saving method. When you've finished, photoshop will generate an "image" folder that contains all the image files as i named. Copy replaces the images (not folder) in the images folder of the theme.

---

## Q) Sources and Credits - [top](#)

I've used the following images, icons or other files as listed.

- Stock Photos by Envato  
[http://themeforest.net/page/asset\\_library](http://themeforest.net/page/asset_library)
- 

## R) Version History - [top](#)

### Version 1.0.5 - *Current Version*

- Added WP 3 menu support. These files has been changed and adapted WP 3.0 (header.php, footer.php, template\_blog.php, template\_product\_list.php, template\_portfolio.php - all files under *rttheme\_options* folder)
- improved (css/style.css - *lines between 40-60, and .slide class on line 773*)

### Version 1.0.4

- Fixed bug on "Show Slider Icons" option (js/script.js)
- Fixed IE6 transparent.png bug (header.php)
- Improved (template\_portfolio.php)
- Improved dynamic sidebars for pages (page.php)
- Dummy content included (XML file)

### Version 1.0.3

- Fixed bug on "Don't Show Products On Start Page" option (template\_product\_list.php)
- Improved - Custom sidebars (controlpanel7.php, rt\_theme\_functions.pgp)
- Improved - (header.php)

### Version 1.0.2

- Fixed Slider timeout bug - (js/scripts.js)
- Fixed contact us form bug - (contact\_from.php, template\_contact\_us.php)
- Improved - (header.php)

---

Once again, thank you so much for purchasing this theme. As I said at the beginning, I'd be glad to help you if you have any questions relating to this theme. No guarantees, but I'll do my best to assist. If you have a more general question relating to the themes on ThemeForest, you might consider visiting the forums and asking your question in the "Item Discussion" section.

Tolga Can
